SHORT TECH SUMMARY

React.js
Typescript
Node.js
Express
Javascript
Vue.js
Github
Git

ABOUT ME

I am a very creative person with a big passion for design, colors and shapes and with an eye for details and full of ideas! What makes development so fun is that there is no limit of what you can create or how much you can learn.

I am a very humble person who likes to spread joy around me and being new to this branch I'm not afraid to challenge myself to learn and to try new techniques. My personal "go to tech" favorites when I'm coding are React, HTML, SASS/CSS, Javascript and Git. Before I started developing I have been working many years in retail and the fashion industry as a visual merchandiser.

Last summer I finished my exam in frontend development at IT-högskolan. After that I have been working for a couple of months at Kvix AB, a fitTech startup company located in Umeå. Due to circumstances I can't stay there, even though me, my manager and the rest of the staff at the company would like me to stay. If you want to know more both me and my manager can verbally describe the reason. Hence I am in search of a new job position as a frontend developer preferably in Stockholm.

WORK EXPERIENCE

KVIX AB
Title : Software developer
Date: 20220117-ongoing
